3DA - Mike, K9NW will operate as 3DA0NW from Swaziland on 20-29 November, including a SOAB High Power entry in the CQ WW DX CW Contest. QSL via home call. [TNX K9NW]

3Y - A few new members have joined the 3Y0X team, which now includes 20 operators. There is still room for two more operators and as many as four "other" travelers who may want to go along, set foot on the island, help with the camp set-up, enjoy the travel experience, but not actually be part of the operating team. Please contact Bob, K4UEE (mallphin@aol.com) if you have an interest in either opportunity.
A container with 11 tons of equipment and personal gear has been packed and is now on its way to Chile. The team will assemble in Punta Arenas on 29 January and shortly afterward, fly to the Chilean Naval Base on King George Island, South Shetland Islands. They will board their vessel there and sail to Peter I, where they hope to arrive around 6 February.
3Y0X (QSL via N200) is expected to be on the air for 12-14 days: the weather will dictate the actual schedule, but a quick strike plan will enable two stations on the air quickly even if weather conditions prevent the entire camp from being constructed immediately. Ultimately, plans are to have nine stations on the air and a complement of 23 antennas (this doesn't include the recent decision to make a real effort on 6m, 2m and 70cm EME). The DXpedition is funded principally by its members, but additional assistance is still being sought. For further information on the DXpedition, and how to contribute to its success, please visit www.peterone.com [TNX K0IR and K4UEE]
